Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 November 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

This action is in response to applicant's amendments submitted 27 November 2006.

Claims 1-29 have been cancelled and claims 30-81 are new.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 30-43, 48-59, and 64-77 are rejected under 35 U.S.C. 102(b) as being anticipated by Michel (US 5,383,865).

Regarding claims 30, 31, 38-43, 48, 53-59, 64, 65, and 72-77, Michel teaches an administering apparatus comprising:

A casing (22) with a reservoir (24);

A driven device (72) with threads (74);

A drive device (168);

A dosage setting member (78) rotationally coupled to the driven device by threads (80);

A translational stopper (154);

A rotational block (150) which permits rotation of the dosage setting member in one direction and prevent rotation in the opposite direction, which comprises a plurality of first (152, 156) and second (154, 172) stoppers abutting each other. See Fig 3-4.

Art Unit: 3767

As to claims 32,33,49,66,67 the first stopper is formed/mounted on the dosage setting member (78/81)

As to claims 34-37,50-52,68-71 the second stopper is connected via drive member 168 to the driven device.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 44-47,60-63, and 78-81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Michel as applied to claims 30,48,58 and 64 above, and further in view of Dibiasi et al (US 6,200,296).

Michel discloses the claimed invention except for the needle cannula being 31 or 32 gauge. Dibiasi et al disclose it is known to use 31 or 32 gauge in column 2, lines 30-40. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the system as taught by Michel with a 31 or 32 gauge cannula as taught by Dibiasi, since such a modification would allow delivery of medication without requiring the patient to "pinch-up" the skin layer during injection (Abstract).

Response to Arguments

5. Applicant's arguments with respect to claims 30-81 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
